Workshop:
Responsible AI in Fintech

January 18, 2023
Azrieli, Triangle Tower

Understand the risks for your company and what to do about them

AI and machine learning are revolutionizing our work. When developed and used responsibly, AI/ML can be extremely effective. However, **irresponsible use of these technologies can harm** customers, societies, and the companies that develop and use them.

This workshop focuses on responsible AI in Israeli fintechs. The goal is to better **understand the risks** that AI poses in fintech **and what fintech companies should do** about it.

The target audience is people who work in the Israeli fintech ecosystem, including all roles that relate to AI/ML, such as executives, engineers, data scientists, product, risk, marketing, sales, and academics.

Ravit Dotan, PhD
AI Ethics Expert

Yair Adato, PhD
CEO at Bria.ai

About the Organizers

Ravit Dotan, PhD

Ravit will be the host of the workshop. She is a subject matter expert in AI ethics and is active in the academic, private, and non-profit sectors. In the academic sector, she directs the CAIR Lab as a postdoctoral associate with the University of Pittsburgh Center for Governance and Markets.

IDSI

The Israel Data Science Initiative is the coordinating body for the seven Data Science Research Centers located in Israel's research universities.

The CAIR Lab

The Collaborative AI Responsibility Lab is a research lab at the University of Pittsburgh's Center for Governance and Markets. The lab's goal is to increase the adoption of responsible AI by combining community-engaged research with activism.
